

# **SERVICE DUE RESET GUIDE**

*for all* **PRESSURISATION SETS**

INDUSTRIES K3 LTD  
126 East Ferry Road, Canary Wharf  
Docklands, London, E14 9FP United Kingdom  
Telephone : 020-8813-1240

## ① Enter the **ENGINEERING SET-UP MENU**

Press the Right-Hand **SET** Button.

The Unit will respond with “**Enter PIN:**”

Enter the Factory Engineering Pin, which is **SPACE, M, P. SPACE**.

This is done by pressing the SET button once (enters a blank/ space), then using the Up/Down Buttons to select a capital M (followed by pressing SET), then use the Up/Down buttons to select a capital P (followed by SET), and finally SET once more to enter a blank/space.

---

## ② To **RESET** the Service Due Alarm

If you wish to *permanently* DISABLE the Service Due Alarm, go to Step 3.

Press the SET Button to skip through all the options until “**Service Hours**” appears in the window. If you press SET too many times and skip through the option you want, press and hold SET a little longer and you will be taken back a step.

The Display currently shows “**SKIP**”. Use the Up/Down Buttons so that **RESET** appears in the window. Press the SET Button to accept the choice. You have now successfully RESET the Service Due counter, go to Step 4.

---

## ③ To permanently **DISABLE** the Service Due Alarm

Press the SET Button to skip through all the options until “**Service Due**” appears in the window. If you press SET too many times and skip through the option you want, press and hold SET a little longer and you will be taken back a step.

Use the Up/Down Buttons so that the HOURS counter is set to ZERO. Press the SET Button to accept the choice. You have now successfully DISABLED the Service Due Alarm, go to Step 4.

## ④ Restart the Unit

You can either wait (about 30 seconds) without touching any Buttons and the unit will exit the Set-Up and restart automatically, or Power-OFF, wait a few moments and Power-ON again.
